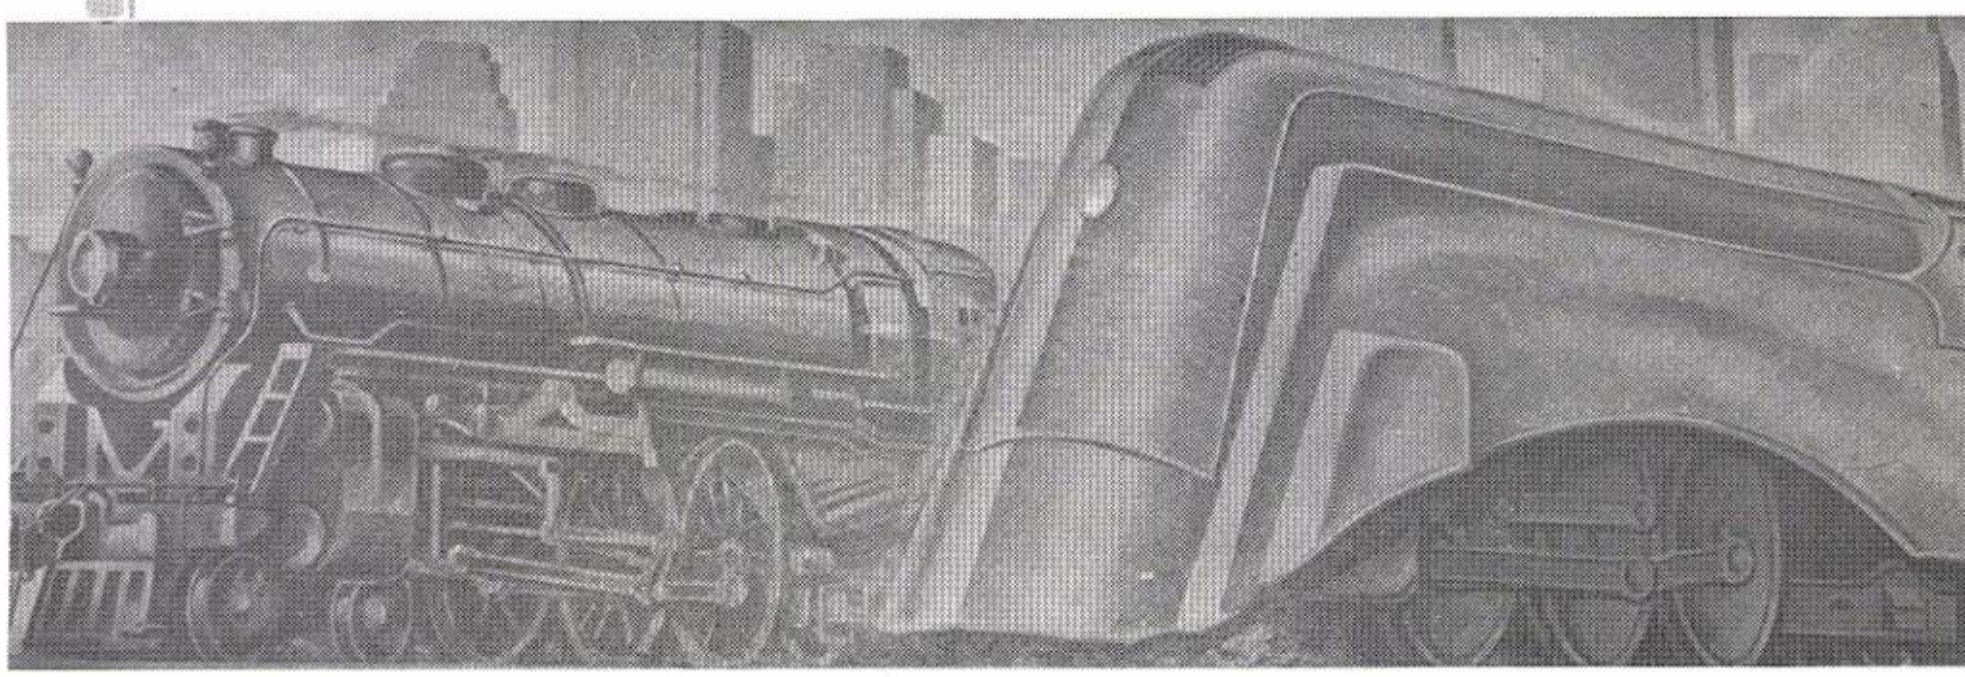
The Railroader

June 1960



COLLINWOOD HIGH SCHOOL

15210 St. Clair Avenue

Cleveland, Ohio

For the Class of June, 1960

Getting a missile off the ground is the first step in putting man into space. Your graduation from high school is the first step in launching yourself toward some future destination.

As you now begin to use the recorded knowledge of mankind which Collinwood has passed along to each of you, you will understand why your ideas needed guidance, interpretation, and many hours of discussion to give them the meaning so necessary to the direct application in your own life.

These ideas which have permitted man to survive and progress will begin to reflect in your ability to speak, to think, and to act with new and better judgment.

It is in this way that you will grow in wisdom.

There are challenging opportunities waiting for each of you — pick the one in which you excel.

Oscar P. Schneider
